DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/30/07 has been entered.
2. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 2, 6 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson et al (US 4,882,454).

Peterson discloses a sequential build-up of layers (col. 3, lines 61-62) to form a resin layer as a first dielectric layer of inner circuit layers (101 and 105 formed close to 102); forming a circuit layer on the resin layer (101 and 105 formed above); forming a second dielectric layer (col. 3, lines 22-25); col. 2, line 36 discloses epoxy; col. 2, lines 31-35 discloses aramid fiber material.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson et al (US 4,882,454) in view of Nakatani et al (US 6,108,903).

Peterson fails to disclose a liquid epoxy.

Nakatani disclose in col. 10, lines 13-14 a liquid epoxy.

Art Unit: 3726

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Peterson by providing a liquid epoxy, as taught by Nakatani, for the purpose of reducing the volatile constituent.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson et al (US 4,882,454) in view of Cutting et al (US 5,633,597).

Peterson fails to disclose dry film type epoxy.

Cutting discloses dry film type epoxy (col. 3, line 56).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Peterson by providing dry film type epoxy, as taught by Cutting, for the purpose of providing a good dielectric property.

8. Claim 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson et al (US 4,882,454) in view of Kiyota et al (US 5,263,248).

Peterson fails to disclose a resin-impregnated fiberglass fabric.

Kiyota discloses a resin-impregnated fiberglass fabric (col. 3, line 53).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Peterson by providing a resin-impregnated fiberglass fabric, as taught by Kiyota, for the purpose of manufacturing a rigid substrate.

Response to Arguments

9. Applicant's arguments filed 4/23/07 have been fully considered but they are not persuasive.

The examiner maintains his rejection. Epoxy is a resin material.

Interviews After Final

Art Unit: 3726

10. Applicant note that an interview after a final rejection must be submitted briefly in writing the intended purpose and content of the interview (the agenda of the interview must be in writing). Upon review of the agenda, the Examiner may grant the interview if the examiner is convinced that disposal or clarification for appeal may be accomplished with only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.

Conclusion

11. Please provide reference numerals (either in parentheses next to the claimed limitation or in a table format with one column listing the claimed limitation and another column listing corresponding reference numerals in the remark section of the response to the Office Action) to all the claimed limitations as well as support in the disclosure for better clarity (optional). Applicants are duly reminded that a full and proper response to this Office Action that includes any amendment to the claims and specification of the application as originally filed requires that the applicant point out the support for any amendment made to the disclosure, including the claims. See 37 CFR 1.111 and MPEP 2163.06.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick K. Chang whose telephone number is (571) 272-4564. The examiner can normally be reached on 5:30 AM to 1:30 PM.
